Progress Chart Instructions - a checkmark will be placed in each box if the child reaches the respective stage.

- In our sheet, we have a child who does not produce the sound (during testing - this is the baseline). Upon arrival at the clinic in the first session, we do sound production exercises... the child does not produce the sound;
- In the following session, the same - the child does not produce the sound;
- In the fourth session, we observe the accidental appearance of the sound;
- We observe production on the seventh day ... and so on.

!!!! It is unnecessary to explain further, as this pattern is easily understandable. !!!!
